

**eco-growth**  
A new perspective on waste

# Cannabis Waste to Energy

Reduce your Cannabis waste  
by up to **80%** and turn it  
into renewable energy

## Revolutionize Your Waste

As an expert in delivering Waste-to-Energy solutions, Eco-Growth is committed to leaving a clean legacy. We partner with clients to create a world where all people can pursue opportunities without waste.

Recent legislation in Canada legalizing recreational cannabis has created a problematic waste stream. As a result of strict disposal regulations, cannabis cultivators must employ expansive on-site composting processes or mix the cannabis waste with other waste streams for transport to landfills at a significant operational and environmental expense. Eco-Growth's Organic Reactors (EGOR™) and Biomass Eco-Boilers are an ideal solution, the organic waste is turned into a combustible fuel source, which heats the water in the boiler system for the cultivation process or facility. Our innovative technology complies with new organics by-laws, is carbon neutral, improves business performance, and allows our customers to get the most out of their waste.

Get the most out of your waste and contact us today.
